## SUMMARY

---

Full-Stack Software Developer with strong foundation in React.js, Django, FastAPI, PostgreSQL, and REST APIs. Experienced in building secure backend systems, scalable web applications, implementing JWT authentication, and developing responsive user interfaces. Passionate About software engineering, problem solving, and building reliable applications while continuously learning modern technologies.

## TECHNICAL SKILLS

---

**Languages:** Python, JavaScript, SQL, HTML/CSS

**Frameworks:** Django, Django REST Framework, FastAPI, React, Flask

**Databases:** PostgreSQL, MongoDB Atlas, MySQL

**Developer Tools:** Git, GitHub, VS Code, Postman, Swagger, MySQL Workbench, pgAdmin 4

**Libraries:** pandas, NumPy, OpenCV, Face Recognition

## EXPERIENCE

---

### Backend Developer

*Firewing Technology*

*IT Park, Navale Icon, Pune*

- Designed, developed, tested, and maintained 6+ production-grade REST APIs using Python, FastAPI, and MongoDB Atlas for healthcare and counseling management platforms.
- Implemented JWT-based authentication and refresh token mechanisms, supporting secure role-based access for doctors, patients, and administrators.
- Built 5+ backend modules covering user registration, appointment scheduling, assessments, audio/video consultation workflows, and patient management modules.
- Performed API testing, debugging, and validation across 10+ REST APIs using Postman to ensure reliability and maintainability.
- Collaborated with a cross-functional team with 5+ members using Git and GitHub while participating in API design, debugging, and testing with Postman.

## PROJECTS

---

### Embroidery Factory Website | *HTML5, CSS3, JavaScript*

- Created a 4+ page production multi-page business website for a manufacturing client featuring a hero image slider, lightbox gallery, contact form, and sticky mobile-responsive navigation.
- Applied professional branding logo, color palette, typography with smooth CSS animations; published on Vercel and live for real clients.

### Attendance System | *Python, PostgreSQL, Django, DRF, ReactJs, JavaScript, OpenCV*

- Architecting a full-stack attendance platform supporting student registration, attendance tracking, analytics, and administrative workflows.
- Implemented secure JWT-based authentication and role-based access control (RBAC) for administrators and students.
- Integrating face recognition and liveness detection workflows to reduce proxy attendance attempts and improve attendance accuracy.
- Building attendance analytics admin dashboards with attendance percentage calculation, subject-wise tracking, semester-wise reporting, and advanced filtering capabilities.

### TaskFlow Landing Page | *HTML5, CSS3, JavaScript*

- Designed and developed a production-ready SaaS landing page showcasing a task management platform for productivity and task organization.
- Crafted responsive layouts across 3 device categories (mobile, tablet, desktop) using Flexbox and CSS Grid.
- Built 4+ interactive frontend features including smooth-scroll navigation, active navbar state management, FAQ accordion functionality, and form validation.
- Enhanced user experience through real-time toast notifications and responsive design across 3 device categories.
- Published and maintained the project using Vercel, demonstrating frontend development and deployment workflows.

## EDUCATION

---

**Jaikranti College of Computer Science and Management Studies**

Katraj, Pune

*Bachelor of Computer Applications*
